Description

Children and seniors work together in small groups (2-3 children and 2-3 seniors). Each group gets all the necessary equipment on the table. First the children soak the oasis with water for seniors. Together they insert green leaves and flowers into it as an arrangement and fix it with arranger wire.

Finally it is decorated by polished stones, shells or ribbons stuck in place with the heat gun. Children help seniors with the work, pass materials, and hold small items.
