

Title

**What can be made of?
(Recycling / 3)**

Season

Any

Time

5 to 10 minutes

Target groups

Elderly
Children from 8 years

Objectives

To show new ways of recycling – such as selective waste collection
To encourage more waste to be sorted before collection
To know about the importance of selective waste collection

Resources

Sheet of paper with the names of the materials of the selective waste collection bins (1 sheet / table)
Pens

Description

Groups of 4-6 persons (elderly people and children mixed) get 1 sheet and pens. They are invited to gather information what products have been produced from selectively collected materials. When each group is ready, we check it together, we ask each group to read / tell their findings.

This activity should be done after Recycling / 2, or after a conversation about selective waste collection.
